

NEED HELP WITH ONLINE LEARNING? ABS can take care of all your online learning administrative needs!

Faced with a lockdown in March 2020, ABS immediately began work to restructure its face-to-face training programmes to be fit for virtual learning. In less than three months, we had developed a full suite of online learning offerings for the industry but we also knew that we could not just stop there. Assistance would also need to be provided in effectively administrating and coordinating the online training sessions - a full time and all day task that could be overwhelming for our clients to host on their own, many of which were working from home.

The ABS Online Learning Administrative Services was introduced to meet these needs. Out of the 325 online programmes that we delivered last year starting in July, almost 70% of that was hosted by us through the services package. We have not taken this responsibility lightly and with the wealth of experience that we have gained, our clients can be assured of the highest level of service when they sign up for our Online Learning Administrative Services Package. Contact us today to find out more on how we can help you!
