ONLINE LEARNING PROGRAMMES

ABS now offers a suite of online learning programmes that we have developed in-house or in collaboration with strategic learning partners that includes some of the leading business schools and other learning institutions in the world. The aim is to cover as wide a range of banking areas as possible with the work on this to be on-going.

Going through the programmes, you may notice that some are a repeat of what we had offered before. These bestselling programmes have been refreshed into a version that is more conducive for online learning. At the same time, more programmes will be added as and when they become available, so we hope that you will continue to check back on our website to see our latest offerings.

While most of what you see here are available for open enrolment, many of these programmes can be delivered as in-house training for organisations. And for in-house training, a selection of the programmes can be delivered online or in a face-to-face classroom. ABS also provides a broad spectrum of consultancy services to create tailor-made training programmes that are specifically aligned with your organisation's strategic learning requirements.

BANK NEGARA MALAYSIA : FOREIGN EXCHANGE (FE) POLICIES

Malaysia continues to maintain liberal foreign exchange (FE) policies which are part of broad prudential tool kits to preserve monetary and financial stability. Bank Negara Malaysia (BNM) is committed in ensuring the FE policies continue to support the competitiveness of the economy through facilitation of a more conducive regulatory environment for cross-border economic activities. The FE policies have become a 'compliance-focused' area among financial institutions in Malaysia where the bank officers will need comprehensive understanding to ensure reasonable compliance to the FE policies and adopt market standards in due diligence process.

This three-day intermediate level training programme on FE policies is jointly developed by the Foreign Exchange Policy (FEP) Department of BNM and Asian Banking School (ABS), which aims to educate participants from the banking industry on the interpretation of FE policies. This interactive programme comprises of discussions on specific case studies under each of the FE Notices to enhance participants' understanding and application in relation to FE policies and banking transactions. At the end of each day, participants will join a focus group discussion facilitated by subject matter experts from the FEP Department of BNM to address any issue faced by their banking institution. Participants will be briefed by an invited Head of Treasurer of an onshore bank about the FE policies from macro-economic perspectives. A 'comprehensive case studies' session is also included to enhance participants' learning on the applications of the entire FE policies.

Upon completion of this programme, participants will be recognised as a point of reference at their banking institution in dealing with matters related to FE policies.

DEBT RESTRUCTURING

This one-day programme aims to answer the many questions that come to the minds of bank managers. It examines the considerations on the part of the banks in deciding whether to restructure a debt or to recall the loan, and what alternatives are available to banks. It walks the participants through the steps and issues involved in debt restructuring and explains each one in considerable detail. The programme will also shed light on the behaviour of lending banks in different scenarios of restructuring.

PROGRAMME DETAILS

Date : 1 September 2022

Time : 9.00am - 5.00pm

Training Platform : Zoom

PROGRAMME FEES*

RM1,200 <small>AICB member</small>	RM1,500 <small>Non-member</small>

DIGITAL TRANSFORMATION

“BANKING IS NECESSARY, BANKS ARE NOT”

- BILL GATES

It has taken years to fully understand what Bill Gates meant when he said, “Banking is necessary, banks are not”. He said it in 1994 and it is becoming true. Advances in technology are causing the banking industry to develop faster with the focus on efficiency, transparency and better customer experience. The current digital revolution is disrupting the way people bank, directed by evolving customer needs, behaviours and expectations. Customers now expect an anytime, anywhere personalised user experience – i.e., banking everywhere, not necessarily at a bank!

At the same time, Covid-19 has disrupted ‘normal’ banking and reset it to the ‘new normal’ to where traditional standard operating procedures were dismantled in favour of agility and the use of online technology to tackle unforeseen marketplace disruption. It exposes the importance of digital offerings to maintain customer onboarding, customer relationship and customer centric mobile banking facilities.

Now more than ever, traditional bankers need to adapt and evolve in order to face the challenges ahead as challenger banks and new FinTech companies explore and experiment with innovations and new technologies to build or create the bank of the future.

This intensive half-day programme which spreads over two days, presents the overview of what digital transformation means, what role they will play, and assist in preparing bank staff for the future when banks will shift their concentration to new technologies. It will be delivered online over 2 days consisting of a 4-hour webinar session each day.

THE PSYCHOLOGY OF FINANCE AND INVESTMENT DECISIONS

“The investor’s chief problem - and even his worst enemy - is likely to be himself.”
Benjamin Graham, 20th-century American economist and famous value investor

Behavioural finance studies the biases and influences that affect the financial behaviours of investors and financial practitioners. It recognises that our abilities to make difficult and complex financial decisions are limited due to the biases and errors of judgement to which humans are susceptible. Being aware of the principles of behavioural finance can help investors check their perceptions against facts.

In this two-day programme, you will learn about the wide range of biases in decision making and information processing errors affecting judgments in finance. It examines cognitive biases, discusses the impact of biases on financial decision-making and also explores the behaviour of investors, fund managers and corporate decision makers. Understanding the different types of biases can be extremely valuable in studying and managing better market outcomes. Advisors who understand the psychological or emotional factors that influence investors to behavioural biases can differentiate their services and better serve their clients.

PROGRAMME DETAILS

Date : 24 – 25 August 2022

Time : 9.00am - 1.00pm

Training Platform : Zoom

PROGRAMME FEES*

RM1,500		RM1,800
AICB member		Non-member

**Subject to 6% Service Tax per pax*

LEARNING OBJECTIVES

By the end of the programme, participants will be able to:

- Describe what is behavioural finance and how it impacts trading and financial markets
- Identify common self-deception biases, their causes and how to prevent them
- Examine cognitive and emotional biases and analyse social factors that distort decision-making and how it impacts outcomes in financial markets

TRAINING METHODOLOGY

Online lecture, case studies, exercises and discussions

PARTICIPANT PROFILE

Investors, fund managers, traders and anyone interested in understanding behavioural finance and how it affects the markets and corporate decision making

PROGRAMME OUTLINE

Introduction

- » Behavioural finance and decision-making biases: how psychological influences can affect market outcomes
- » Reflective vs reflexive approaches to decision making
- » Heuristics and mental short-cuts: make decision-making simpler and faster through shortcuts and good-enough calculations but it can also be prone to bias and errors in judgment
- » Why investors are often irrational: the cyclical investment process is ladden with psychological pitfalls. Only by avoiding inherent behavioral biases can investors hope to reach impartial decisions

Case Study

- » Traditional Finance vs Behavioural Finance - how investors' "humanness" can lead them to make sub-optimal financial decisions they would not make if they were entirely rational as traditional finance theory supposes them to be

Self-deception Biases

- » Self-deception can severely limit the way we learn. When we mistakenly think we know more than we actually do, we tend to miss information that we need to make an informed decision. It is important to learn how self-deception biases impact decision making in finance and trading
- » Overconfidence bias: overconfidence is the driving force behind the irrational exuberance that can cause a market to crash. People who feel more financially secure than they actually are may spend too much or not save enough. Or they may be overactive traders who believe they can time their investment decisions to beat the market but end-up doing the opposite
- » Illusion of knowledge and control: why people think they can control random and uncontrollable events and why online traders tend to trade more frequently than they should
- » How to guard against self-deception biases

Case Study

- » The trouble with confidence (according to Daniel Kahneman - the "Father" of Behavioural Finance)

Cognitive Biases

- » Hindsight bias: regrets and why this leads to investors unknowingly making poor decisions going forward
- » Confirmation bias: why investors often do not always behave rationally and why this supports argument that the market behaves inefficiently
- » Representative bias: tendency of decision-makers to make decisions based on stereotypes, to see patterns where perhaps none exist
- » Anchoring bias: people rely too much on pre-existing information or the first information they find. They anchor their decision on mental reference points
- » How to guard against cognitive biases

Case Study

- » How cognitive biases can impact investment decisions and what can be done to control this?
- » How to improve your daily decision making: top cognitive biases to avoid?

Emotional Biases

- » Overview of emotional biases
- » The narrative fallacy: we love stories and we let our preference for a good story cloud the facts and our ability to make informed decisions
- » Loss aversion and prospect theory
- » How to guard against emotional biases: looking towards logic rather than emotion in investment decisions

Case Study

- » Overcoming emotional biases to have a successful investing experience
- » Theranos and Elizabeth Holmes - how everyone was fooled by narrative

Social Biases

- » Herding bias: many investors often follow what they perceive other investors are doing rather than make decisions based on their own analysis
- » Impact of social influence on investor's trading behaviour, for example sell-offs and rallies
- » Guarding against social and herding biases

Case Study:

- » Herd mentality in the financial markets
- » How to break from the crowd and be a successful investor

Conclusion: be aware of biases that affect investment decisions

Exercise and discussion: How to overcome "investor irrationality?"

BUSINESS ETHICS FOR MANAGERS

Bowen McCoy, a senior manager at Morgan Stanley, and a group of mountaineers have been preparing over six years to climb the Himalayas. Thousands of dollars had been spent on this expedition. At an extremely challenging part of the climb, the group comes upon a holy man – a Sadhu, who was dying from hypothermia. The group, and thereby each individual within the group, were faced with an unfortunate dilemma – to continue the climb and achieve their goals or carry the Sadhu two days back to a town to save the life of a stranger.

This two-half-day programme explores the challenges of personal ethics when applied to a group – when personal moral values clash with group norms and how organisational culture can impact the ethical climate of an entity.

PROGRAMME DETAILS

Date : 5 - 6 October 2022

Time : 9.00am - 1.00pm

Training Platform : Zoom

PROGRAMME FEES*

RM1,500

AICB member

RM1,800

Non-member

*Subject to 6% Service Tax per pax

LEARNING OBJECTIVE

By the end of this programme, participants will be able to:

- Appraise the levels of accountability in an organisation
- Assess the philosophical and psychological approaches to business ethics
- Reflect on cultural typologies and how they influence organisational behaviour
- Formulate a view on what constitutes ethical and professional behaviour in an organisation
- Evaluate practical decision making and moral judgement and finding the balance between the two

PROGRAMME DELIVERY

- This programme can be delivered either via face-to-face classroom or webinar
- It is interactive using Kahoot, quizzes, polling and discussion of case studies in breakout areas/rooms

PARTICIPANT PROFILE

Managers, Heads of Department, Division Heads, Senior Executives and C-Suites in the capacity of managing sales force, operational planning, staff performance, strategic thinking and organisational culture.

PROGRAMME OUTLINE

Levels of Accountability in an Organisation

This module examines Bank Negara Malaysia's (BNM) approaches to strengthening conduct and culture in the financial services industry. Corporate governance principles are examined and case studies done to demonstrate that a code of ethics alone does not deter inappropriate behaviour.

Case Study: Carries Tolstedt

Case Study: Aman Shah

Philosophical and Psychological Approaches to Business Ethics

Prescriptive ethical theories developed by philosophers designed to help individual decide what they should do in response to ethical dilemmas are compared and contrasted with psychological theories that describe what individuals actually do due to mental and emotional processes that influence how people think and behave.

Case Study: Ethical issues in Artificial Intelligence in banking and finance

Case Study: Katharine Gun

Cultural Typologies and Organisational Behaviour

This module examines the role of culture in organisational behaviour. Hofstede theory is discussed to understand how cultural dimensions differ in various cultures and its impact in ethical decision making.

Case Study: CNN

Professional Behaviour in an Organisation

Here we consider what professionalism means in banking and the role of professional bodies. While professionalism may be seen to be demonstrating technical competencies, various behavioural attributes have been acknowledged as critical in creating the basis of a profession.

Case Studies: A series of caselets using MCQs to test the ability of participants to make ethical decisions in various real life banking scenarios.

Practical Ethical Decision Making

In making real world ethical decisions, one has to take into consideration sustainability, political forces, eastern philosophies and long term consequences in arriving at pragmatic ethical decisions.

Case Study: Ibn Rushd's influence in practical ethical decision making

INTRODUCTION TO ETHICS IN BANKING

Since January 2017, all new graduates hired by the banking industry were required to complete a programme on Introduction To Ethics in Banking. Designed, developed and delivered by the Asian Banking School (ABS), over twenty thousand bankers have gone through the training since its inception, which considering the importance of the subject matter, bodes well for the industry itself.

In our continuous efforts to deliver programmes that are innovative and current with the times, ABS has developed an online learning version of the Introduction to Ethics in Banking programme, alongside the existing classroom training option.

The classroom training is an 8-hour face-to-face session, while the online programme comprises of 8 hours self-paced e-learning that is followed by a 1½ hour webinar, both of which must be completed within 7 days upon registration. As the programme is at an introductory level, it will focus on ethical issues that are commonly encountered at the operational level, which includes integrity, conflict of interest, confidentiality and whistleblowing.

MANAGING CONDUCT RISK IN BANKING (MODULE 1)

Conduct risk is broadly defined as any action of a financial institution or individual that leads to customer detriment or has an adverse effect on market stability. An emphasis on customer-centricity and cultural change can help avoid legal, regulatory and reputational risks while creating value for customers and shareholders.

Organisations operating in the financial services industry and capital markets that adopt a comprehensive strategy to manage conduct risk can gain significant competitive advantage.

In December 2021, BNM issued the "Wholesale Market Conduct Practices Guidance Document" that provides practical and operational guidance to market participants in managing policy, procedures and controls surrounding wholesale financial market conduct risk. Regulators across jurisdictions worldwide are making conduct risk a priority. Regulated financial institutions that fail to bring conduct risk in line face regulatory action, fines and reputational damage, which can have long-term damage to their business.

This programme is designed to provide practical understanding of the key conduct risks facing financial services industry professionals and the techniques and tools to identify, measure and mitigate conduct risk to improve business performance.

CERTIFIED EXPERT IN SUSTAINABLE FINANCE

NOW WITH UPDATED SYLLABUS FOR SEPTEMBER 2022 INTAKE ONWARDS!

The global economy has grown rapidly in the last 200 years but this achievement has come at the cost of climate change and environmental damage. With increased environmental awareness among nations and people, a global strive towards sustainable development is now growing. You may ask yourself what does this have to do with finance? Making the necessary change, transformation of our economies and societies require commitments, innovations and, last but not least, finance and investments.

Sustainable Finance can help steer the global economy towards sustainability and accelerate the necessary change. The financial sector has an important role in deciding where capital flows and by implication where it does not flow to. In this programme, you will learn about creating impact, managing sustainability risks, and benefiting from sustainable business opportunities. It will familiarise participants with the business, regulatory and technical perspectives of sustainable finance and will acquaint them to take an active part in the discussion around the topic. The programme aims to enable financial professionals to integrate Sustainable Finance related aspects into their work through new knowledge and tools for advising their clients and business partners.

The programme provides a comprehensive introduction to the world of sustainability, no prior knowledge of Sustainable Finance or Finance is required.

PARTICIPANT PROFILE

Finance experts and professionals, including retail bankers, financial advisors, asset managers, risk managers etc. and all other financial industry professionals interested in the topic of sustainable finance.

PROGRAMME OUTLINE

The programme takes approximately 6 months assuming 5-8 hours of self-study per week. It consists of 10 mandatory units, which build upon each other.

UNIT 1 : The World of Sustainability

This first unit sets the scene and introduces participants to the world of sustainability by explaining the key factors that underpin the science of climate change and global warming, including climate diplomacy. It also provides an overview of the different rationales for why integrating sustainability considerations into the financial market is important and discusses the role of the financial system in the transformation to a low-carbon and more sustainable economy.

UNIT 2 : Towards a Sustainable Financial System

The institutional setup is important for mainstreaming sustainability in the financial system. In Unit 2, participants are introduced to the role of the financial system, involved stakeholders, and their interplay, especially in the context of driving the transition towards a sustainable financial system. The specific roles of the different financial actors are explained, accompanied by practical exercises in an interactive learning environment.

UNIT 3 : The Role of Regulation and Policy

Unit 3 demonstrates and explains through detailed examples of the role and rationale of regulation and policy in sustainable finance. There is also a “deep dive”, a closer look, at the EU sustainable finance regulatory and policy landscape provided in this unit.

UNIT 4 : Sustainable Finance in the Financial Institution's Strategy

The unit introduces the strategic implications of mainstreaming sustainable finance within institutions, continuing the structure introduced in previous units of looking at risk and impact management as well as the resulting opportunities from a strategic point of view.

UNIT 5 : Sustainability Risks and Impact Through Financing

Unit 5 discusses how to implement and manage sustainability risks and create impact through financing for financial actors. It will deepen the participants' knowledge of the risk and impact perspectives. An overview of (main) sustainable finance risks that financial actors are facing will be provided, together with steps to be taken to identify, measure and mitigate them. Moreover, the importance of impact measurement and its methodological concepts are introduced in the unit.

UNIT 6 : Sustainable Finance Opportunities (Products)

Unit 6 provides an overview of sustainable finance related opportunities. It focuses on debt and equity-related sustainable products, especially green bonds, and is complemented by a section on additional services.

UNIT 7 : Banking

This unit provides an overview of the market environment, potential, development, and criticism for wholesale and investment, retail, and corporate banking products and services.

UNIT 8 : Institutional Investors

Unit 8 provides an overview of the institutional investors, their mandates as well as implementation methods. Furthermore, the unit discusses the role and construction of benchmarks.

UNIT 9 : Insurance

The role of insurance in mitigation of sustainability is discussed in unit 9. Participants will learn what role insurance plays within the wider financial system and build an understanding on how climate-related financial risks are impacting the finance sector.

UNIT 10 : Recap and Outlook

The course concludes with a re-cap of the learning materials from unit 1 to unit 9, while also making an outlook of ongoing and upcoming developments in the sustainable finance sector.

UN SUSTAINABLE DEVELOPMENT GOALS

This programme equips you with the knowledge to advance the following SDGs:

CERTIFIED EXPERT IN ESG & IMPACT INVESTING

1 CPD hour for each hour of study time, up to a maximum of 20 CPD hours per course

Environment Social and Governance (ESG) and Impact Investing are approaches to finance that are related to each other, although they may occupy different ends of the spectrum in terms of methodological intensity or operational mind-set. They have gained a lot of traction in recent years and will continue to do so in the (post-) Corona world. Calls for a green and socially equitable re-start are very prominent. The EU's Green New Deal ("Green Deal") and the UN's Sustainable Development Goals (SDGs) are good examples of how ESG criteria and ideas of Impact Investing are being incorporated into policy objectives.

PARTICIPANT PROFILE

Finance experts and professionals, including retail bankers, financial advisors, asset managers, risk managers etc. and all other financial industry professionals interested in the topic of sustainable finance. Also designed for those working in international DFIs, multilateral donor organisations, institutional investors, pension funds, insurance companies, asset and fund managers who want their investments to achieve positive impact.

PROGRAMME OUTLINE

The course takes approximately 6 months assuming 4-6 hours of self-study per week. It consists of 7 mandatory units, which build upon each other.

UNIT 1 : Introduction and Overview: What are ESG Criteria and Impact Investing

This introductory unit provides you with an understanding of how ESG criteria and Impact Investing relate to traditional mainstream finance. It familiarises you with major stakeholders, initiatives, and approaches for integrating non-financial issues into the day-to-day activities of investing. Key concepts and themes are introduced, which establish foundations for a learning journey that will be expanded upon over the subsequent units.

UNIT 2 : Historical and Theoretical Context

ESG and Impact Investing are orientated within different operational contexts: from asset management, through direct investment, to advisory services, etc. This unit helps you understand what is relevant for your context, whilst also making you aware of other requirements you may encounter in adjacent parts of the industry. It contextualises the historical evolution and theoretical development of ESG and Impact Investing to show how they complement each other, and to demystify why some narratives about managing non-financial factors appear to be fragmented and conflicting. Conceptual structures are presented that help you apply theory to praxis via a unified framework.

UNIT 3 : Strategies for Measuring and Managing ESG Criteria and Impact

There are different strategic pathways available to managing ESG and impact factors. Each pathway represents a different level of methodological intensity. You will be introduced to the techniques and tools that are relevant for each, and learn how to choose the pathway that is most suitable for your needs or circumstances. This unit also clarifies how these strategic pathways align with operational mind-sets such as compliance, risk management, as well as proactively managing performance against non-financial goals.

UNIT 4 : Integrating ESG and Impact Management in the Investment Process

Each of the strategic pathways for managing ESG and impact can be integrated at every stage of the investment process: from deal sourcing and due diligence, through ongoing investment management, to final exit or contract maturity. These all follow the same high-level process that aligns with the Deming quality management cycle. This is applied with different levels of intensity and granularity depending on the strategic pathway being followed. You will learn how this process can be deployed across all asset classes, across publicly traded securities and private over-the-counter transactions, and by retail investors as well as institutional investors.

UNIT 5 : Specialised Financial Instruments and Legal Contracts that Integrate ESG and Impact

This unit starts with an introduction of traditional asset classes and financial instruments (a refresher for anyone familiar with both investing and philanthropy). You will learn how ESG and impact features are incorporated into financial instruments. This can be achieved either by enhancing traditional instruments with additional requirements and obligations, such as with Green Bonds; or by developing innovative instruments and hybrid models that introduce new contractual and financial arrangements, such as Social Impact Incentives.

UNIT 6 : Ratings, Indicators, Non-Financial Reporting and Data

There are currently no universally accepted standards for reporting non-financial information, although there are several voluntary frameworks and norms established by industry initiatives. You will learn about the key regulations and legal requirements that are currently in various stages of development, notably by the European Commission. The unit also covers key trends, selected best practice, and challenges to help you navigate the various ratings, labels, certifications, and evaluation methods that are available. The challenges and opportunities in data collection are outlined, which explains why information from different providers of data and ratings is often weakly correlated.

UNIT 7 : Elective Module

Participants choose one module from the following options. The unit will conclude with an assignment that is tailored to the option you choose.

- » 7a Marketing, Fundraising and Sales – this option allows you to delve deeper into designing and presenting a product, fund, or other business idea for ESG and impact investing. It covers fund design, investor targeting, and how to present to investors.
- » 7b Due Diligence – this option allows you to delve deeper into assessing investment opportunities. It covers the different tools available and how to take into account the market context, governance, legal form and business models, as well as planning an on-site visit.

OPPORTUNITIES AND RISKS IN BANKING ARISING FROM ESG & GREEN FINANCE

Understanding and mastering the opportunities and risks arising from the Environmental, Social and Governance (ESG) criteria, such as climate change, is of key importance for financial market professionals. Institutional investors, private wealth bankers, and portfolio investors are frequently asked by clients to “green” their portfolio. At the same time, (financial) market regulators are acutely aware of sustainability risks. These are risks arising along a business’s supply chain, which may not be compliant with ESG criteria for various reasons, and which are formidably difficult to measure and assess. This programme aims to equip participants with the tools to clearly identify ESG related risks and opportunities and to provide impetus for the innovation of new sustainable financial products.

PROGRAMME OUTLINE

SESSION 1 : Risk Management in Green and Sustainable Finance

Sustainability has been on the public agenda for many years. Pricing risks and opportunities is one of the basic mechanisms that make financial systems work. The first session starts with an overview of the current status of sustainability related regulation – where are we heading now. Afterwards we will learn why a holistic sustainability approach for an organisation is important, and we will deep-dive into certain risk management perspectives from an Environmental, Social and Governance (ESG) point of view, with a focus on financial institutions and its different operational functions. We will also go through different frameworks that can be applied for practical ESG metrics implementation.

SESSION 2 : Future of ESG / Sustainability Data

ESG Data are an important information source for integrating ESG criteria in business processes and financial analysis. Even though, ESG data have already been used for many decades, their use has become more and more pronounced in the investment communities in the recent years. In this session, we imagine a future in which the analysis of sustainability information is easy, accessible, and real-time. This session explores some of the major pain spots in obtaining ESG data, and also examines the reasons why ESG ratings are weakly correlated. It session then explores how a data science approach could unlock more potential from the data about sustainability related impacts. The session focuses on high level issues and simplified examples in order to reveal key principles. It incorporates class discussions and interactive group work to explore if an “Internet of Impact” is possible – and how it could function.

SESSION 3 : Exploring Climate-Related Scenarios

Global warming above 2°C relative to pre-industrial period could lead to adverse economic and social consequences. Financial and non-financial institutions are both likely to be heavily affected by climate change in the mid to long term through physical risks and transition risks. In order to help organisations prepare themselves to better understand future scenarios, this session will introduce participants to the concept, methodology and techniques of climate scenario analysis. It aims to take you on a journey with user-friendly scenario exploration tools to look at different climate-related scenarios under different assumptions. Participants will do some hands-on exercises in guided group work. We will jointly discuss the implications of different scenarios on financial and business activities under increasing sustainable finance regulations and stricter climate policies.

SESSION 4 : Classifying Sustainable Financial Products

As sustainability issues become increasingly important for asset owners and investors, the sustainable finance industry has evolved from offering lighter-tough approaches towards driving more sophisticated and intensive ways of engagement for these issues. In this session, we will update you on the latest developments on taxonomies and their role in classifying green and sustainable financial products. Participants will discuss and experience what it means to measure sustainability, which challenges are related to it and how those challenges might be overcome in the future. The session also provides insights into the relationship of labelling and classifying sustainable financial products.
